The V5MF5 is a compact multi-modality system combining both VMS and MultiForce for a multitude of additional movements and can be used by 1-3 people at the same time. This combo system is perfect for specialized sports, occupational, rehab and therapeutic movements. The V5MF5 footprint requires only 4.5 sq. feet of floor space. When mounted to a wall, it sticks out only 7.5" from the wall. Its shared-space design allows the floor space in front of it to be reclaimed for many other daily uses. Includes a 4 prong accessory wall rack (4PWR).

HeadLok™ engineered screws are supplied to anchor the unit to wood stud walls. (20 HeadLok screws included)

Concrete and block wall anchor kits sold separately.
