# VMF5K

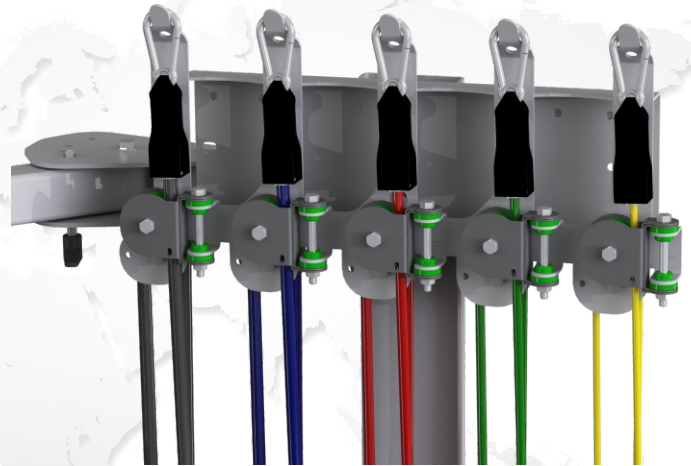

## 5 Band Bank Kit Bolt on for V4 and V6 ONLY

The VMF5K is an Add-On kit designed to attach to either the V4 or V6 unit and converts it to a multi-modality combo system that 1-3 people can use at the same time. Illustrated below attached to a V6. (Includes 2 handles and 4 ankle straps)

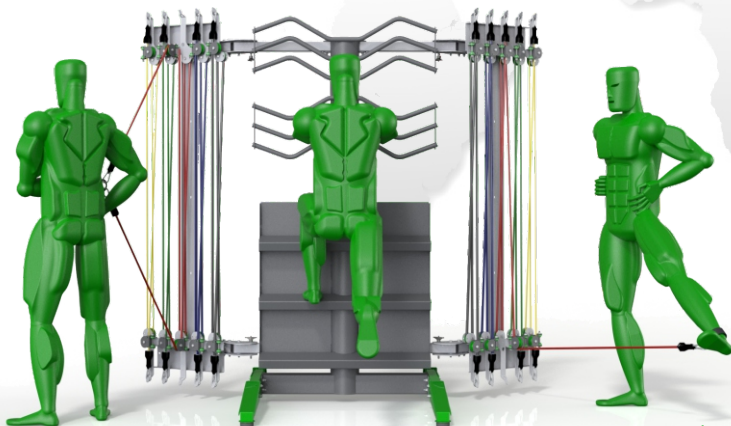

The Clip-N-Go band bank sets up fast and easy and can duplicate just about any force or movement needed for advanced rehab, occupational training, extreme sports, or anything in between. Assembly required.

The band bank organizes and stores all of the various resistance bands. The right and left sides can be adjusted to any of four different angles independently for optimal reproduction of forces. (V6 sold separately)

Overall Dimensions & Weight:  
 82.375-100"W x 7.5"-23.5"D x 78.75"H  
 155 lbs.
